Energy rating and EPC

This property's current energy rating is B.

For more information on the property's energy performance, see the EPC for this property.

Recommendations

Make these changes to improve the property's energy efficiency.

Recommended improvements are grouped by the estimated time it would take for the change to pay for itself. The assessor may also make additional recommendations.

Each recommendation is marked as low, medium or high. This shows the potential impact of the change on reducing the property's carbon emissions.

Changes that pay for themselves within 3 years

Recommendation	Potential impact
In some spaces, the solar gain limit defined in the NCM is exceeded, which might cause overheating. Consider solar control measures such as the application of reflective coating or shading devices to windows.	Medium

Changes that pay for themselves in more than 7 years

Recommendation	Potential impact
Add optimum start/stop to the heating system.	Low
Consider installing building mounted wind turbine(s).	Low
Consider installing solar water heating.	Low
Some windows have high U-values - consider installing secondary glazing.	Low
Add weather compensation controls to heating system.	Low

Additional recommendations

Recommendation	Potential impact
Consider installing an air source heat pump.	High
